

Blood Lead Screen

A part of the Head Start physical is to complete a blood lead screen. When your child had their physical exam completed this test was not completed. The Head Start nurse would like to conduct this test on your child in order to meet the Head Start Performance Standards and to ensure that your child has safe lead levels in their blood. This screen requires a finger stick to test your child's blood and only takes a few minutes to do. Once we receive the results we will send you a copy. If you have any questions please call the Head Start office at 1-877-384-3683.

Permission to Screen

I, _____, give Head Start permission to do a blood lead
(Parent / Guardian's name)

screen on my child, _____.
(Child's name)

(Parent / Guardian's signature)
